Banking and cyber security

# EXHIBITORS OF FORUM MADE IN RUSSIA 2021

## ALIOTH

ALIOTH is Russian leading manufacturer of banking cards, owner of SCONe, an EMV certified card operating system and universal platform for non-financial services. Since their first issue in 2013, SCONe-based cased products have achieved strong positions in the Russian market.

### Products:

1. Identification documents
2. SCONe operating system
3. Payment wearables

**Website:** en.alth.ru

**Region:** Moscow

**Industry:** Payment card production

Export geography: Philippines, Cameroon, Cyprus, UAE

Potential markets: Africa, South East Asia, Middle East

### Advantages of product/company:

- ✓ Own software development department
- ✓ ALIOTH develops payment card products based on own card operating system SCONe certified in VISA, Mastercard along with additional applications.
- ✓ АЛИОТ – first company on Russia which certified and developed payment solutions with innovative form-factors. (rings, fobs, wristbands)

**Demonstration:** Products

**Representatives:** Andrey Pilishenko, Chief product officer; Mpando Paul, Executive Head of International Business.

# EXHIBITORS OF FORUM MADE IN RUSSIA 2021

## RPC KRYPTEN JSC

### Exhibited products:

1. Brand Security: security labels, holographic self adhesive tamper evident security seal

2. Banknote Security: security thread

3. ID Security: security laminates, patches & overlay

Website: [www.krypten.ru/en](http://www.krypten.ru/en)

Region: Dubna, Moscow region

Industry: We produce optical security features for banknotes, packages, and goods to protect them against counterfeiting

Export geography: EU, CIS, Central Africa, Latin America

Potential markets: whole world

Advantages of product/company:

- ✓ Uniqueness
- ✓ High degree of protection
- ✓ Innovative developments

**Demonstration:** products

**Representative:** Akimova Anastasia

Head of the Strategic Development Department

## VENDOTEK

### Terminal Technologies Group,

The leading innovative developer of cEMV validators and POS terminals, founded in 2004, developed the first Russian POS terminal in 2009. Validator Exporter No. 1 in Russia.

More than 90,000 VENDOTEK devices accept contactless payments in Russia, Europe, Asia. Our R&D, office, and production center are located in Moscow, Zelenograd.

#### Products:

1. cEMV validators & POS terminals VEN

Website: [en.termt.ru](http://en.termt.ru)

Region: Moscow

Industry: Electronics manufacturing

Export geography: Europe, CIS, Asia

Potential markets: Europe, CIS, Asia, USA, Africa

Advantages of product/company:

- ✓ Certified by MIR, Mastercard, Visa, UnionPay
- ✓ Compact and user-friendly design
- ✓ Bright touch screen
- ✓ Ultra-fast card reading and switching between EMV and MIFARE
- ✓ The price is several times lower than that of standard large-sized validators

Demonstration: VENDOTEK accepts payments (without debiting) with bank cards, smartphones, Troika cards, QR codes

Representative: Dmitriy Kornienko, Chief Marketing Officer

# EXHIBITORS OF FORUM MADE IN RUSSIA 2021

## MALLENOM SYSTEMS LLC

One of the leading Russian companies in the development and implementation of video analytics and industrial control systems based on machine vision and artificial intelligence (machine learning, deep learning). The company has successfully implemented a wide range of science-intensive IT projects in various industries: metallurgical, automotive, consumer goods, logistics, food and beverage, pharma, etc.; as well as delivered a number of off-the-shelf video analytics solutions for vehicle and railway transport, detection and tracking of people and events.

### Products:

1. VISCONT systems for product and packaging quality control and tracking
2. EYECONT system for detection and monitoring of people on video
3. AUTOMARHAL ANPR system
4. AUTOMARSHAL.Weighbridge systems for automation of vehicle weighing
5. ARDIS system for railcar identification and monitoring
6. AVEDEX software for vehicle and pedestrian traffic analysis, etc.

Website: [www.mallenom.com](http://www.mallenom.com)

Region: Vologda region

Industry: IT (video analytics, industrial automation)

Export geography: Abkhazia, Armenia, Belarus, Belgium, Bulgaria, China, Czech Republic, Japan, Kazakhstan, Kirgizstan, Lithuania, Luxemburg, the Netherlands, Poland, Tajikistan

Potential markets: CIS, Turkey, UAE, Germany, Morocco, Vietnam, Thailand, and others.

Advantages of product/company:

- ✓ Innovative solutions based on latest technologies for machine vision and artificial intelligence;
- ✓ Individual and flexible approach to addressing challenging control and automation tasks;
- ✓ Training and technical support are available.

Demonstration: video, leaflets.

Representative: Anna Orgolainen, Head of Commerce.

## SECURITY CODE LLC

A Russian company that can, by using its own products, provide complete protection of the basic IT infrastructure: endpoints and servers, the network perimeter, modern virtual infrastructures and mobile devices.

### Products on display:

1. CryptoPod Headset
2. Solution "Quantum Key Distribution" (QKD)

Website: <https://www.securitycode.ru>

Region: **Russia, Moscow**

Industry: **IT (cybersecurity)**

Export geography: **Asia, Africa, Latin America**

Potential markets: **Asia, Africa, Latin America**

Product / company advantages:

- ✓ 25+ years of experience in the field of information security
- ✓ Unique endpoint security solution (SNS + Sobol). Our approach to protecting information without analyzing it.
- ✓ Ability to implement Zero Trust principles and can cover all IT infrastructure security areas – Networks, Endpoints, Private Cloud.
- ✓ We use our own verified encryption algorithm.
- ✓ We can implement segregation of duties between IT administrator and Security officer.
- ✓ We are ready to make a joint venture with local companies in order to localize HW/SW products while cooperating with local regulators.

Demonstration at the stand: The headset will be presented in the form of samples. QKD will be presented in the format of video presentations, handouts on other products of the company.

Representative of the company at the stand: Nenashev Grigory Mikhailovich, Business Development Manager.

## SPEECH TECHNOLOGY CENTER

Speech Technology Center is the leading developer of facial recognition, voice and multimodal biometric systems, as well as solutions for audio and video recording, processing and analysis. With one of the largest R&D teams in the industry and more than 30 years of experience, Speech Technology Center is well known for solutions implemented by some of the largest international companies in banking, security, telecom and public sectors.

### Products:

1. Voicekey.platfrom
2. SmartTracker
3. GridID

Website: <https://speechpro.com/>

Region: Russia Federation

Industry: IT

Potential markets: CIS, LATAM, MENA, APAC

Advantages of product/company: CIS, LATAM, MENA, APAC

- ✓ 30+ years of working experience
- ✓ Winners of international competitions in voice recognition, face and voice biometrics
- ✓ In-house R&D

Demonstration: video-content.

Representative: Glebov Oleg, International Business Development Director .

# EXHIBITORS OF FORUM MADE IN RUSSIA 2021

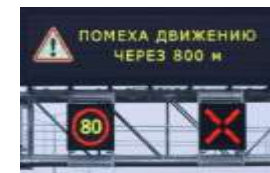

## NATIONAL TELEMATIC SYSTEMS

The concern "National Telematic Systems", founded in 2015, is engaged in the market of telematic services in Russia, CIS, Asia, and Latin America. NTS is the largest developer of solutions for intelligent road infrastructure in Russia. The companies of the group cover the full cycle of product development: from design of hardware and software elements of smart roads to implementation of federal-scale projects. The concern includes research laboratories, testing grounds, production sites, integration and operational subdivisions. Priority areas for NTS development projects are: intelligent transport systems, solutions for toll roads, infrastructure of smart cities, multimodal freight transport platform, solutions for the Internet of things and unmanned vehicles. More than 1,000 high-tech road infrastructure facilities have been equipped with the items developed by National Telematic Systems; the total length of the highways fit up by the concern exceeds 50,000 km. More than 2.5 million microelectronic products created in the NTS are being used worldwide. Every day, over 400 thousand transactions are processed by the NTS equipment. The concern NTS has developed and implemented a unique innovative technological platform for the Central Ring Road, which includes the Russia's first barrier-free toll fare collection system operating on the "Free Flow" principle, an automatic traffic control system of the new generation, and a technology of interaction with unmanned vehicles. With all the competencies at hand, the concern "National Telematic Systems" is able to meet technological challenges and implement projects of any scale at city, region, or country level. The expertise of National Telematic Systems covers the full cycle of building and deployment of products and solutions for road and rail transport: from hardware and software design of smart roads to implementation and support of federal-scale projects. The concern "National Telematic Systems" is actively participating in development of national and federal projects in the field of transport infrastructure (including projects for development of unmanned transport and logistics) and is the largest developer of solutions for intelligent road infrastructure in Russia.

### Products:

1. Automated system of weight and dimension control (ASWDC) "Bizmen 7"
2. Video detector
3. Blank out signs and panel
4. On-board devices of BU MT 001 for the «PLATON» system
5. Electronic Navigation Seals
6. RFID Locking and sealing devices
7. Free Flow toll fare collection system

**Web-site:** telematika.com

**Region:** Moscow, Kazan

**Industry:** electronics, microelectronics, nanotechnology, software

**Export geography:** India, Indonesia

**Potential market outlets:** CIS countries, Indonesia, India, Colombia, and Turkey

**Demonstration at the stand:** presentation of product models, video materials.

**Representative of the company at the stand:** M.I. Nigmatzyanov, Director of the company "Kazan-Telematika" ("National Telematic Systems")

Industrial Automation  
Drone Applications  
SW development  
New Technologies

## ZYFRA

Zyfra Robotics (formerly VIST Robotics) focuses on R&D in the field of artificial intelligence and autonomous vehicles: haulage system, system for drilling, semi-autonomous system for loaders, remote-control for dozers. Zyfra Robotics is one of the 3 first companies in the world to launch robotic dumper trucks in its operations. A resident of the Skolkovo IT cluster.

### Products on display:

Robotics solutions for drills and dumpers

Website: [zyfra.com](http://zyfra.com)

Region (representative offices): Russia, Finland, Kazakhstan

Industry: Mining

Export destinations: Latin America, South Africa, Indonesia, India

Potential markets: Vietnam, Australia, Europe

Product Benefits:

- Increased industrial safety (man in a safe environment; machinery is equipped with radar, which limits pit falls, breakdowns, hit-and-runs)
- Increased productivity of machinery (24/7/365 in any weather conditions from -50 to +50)
- Reduced operating costs (repairs, fuel, etc.)
- Reduction of labor costs (1 operator controls 4 units of unmanned vehicles)

Demonstration at the booth: video content, presentation.  
Company representative at the booth: Alexey Yakovenko, CEO of Digital Robotics.

## COGNITIVE ROBOTICS LLC (Cognitive Pilot)

Cognitive Pilot is a leading Russian company developing artificial intelligence technology for self-driving vehicles. Since 2019, Cognitive Pilot becomes part of the Sberbank ecosystem.

### Products:

1. Autonomous driving system for agricultural machinery (Cognitive Agro Pilot)
2. Autonomous driving system for city tramways (Cognitive Tram Pilot) and railway machines (Cognitive Rail Pilot).
3. Radar CPRR24

Website: <https://cognitivepilot.com/>

Region: Moscow, Russia

Industry: IT

Export geography: China, USA

Potential markets: Canada, Brazil, Argentina, Australia, Europe (Germany and France)

Advantages of product/company:

- ✓ Autonomous driving systems are based on the technologies of machine vision, neural networks and artificial intelligence
- ✓ Quick payback
- ✓ The product quickly adapts to different regional conditions and industry specifics

Demonstration: video presentations and autonomous driving systems themselves - Cognitive Agro Pilot and the elements of the Cognitive Rail Pilot, including the radar.

Representative: Kayumova Alfiya, Vice President for Corporate Development and Investments

## Scientific Innovation Engineering Center RADIUS JSC

JSC Scientific Innovation Engineering Center "Radius" has been working in the field of industrial safety to create a special wireless mine communication since 1991.

JSC Scientific Innovation Engineering Center "Radius" has its own production base for the production of electronic equipment.

### Products:

1. Miner's cap lamp "Radius RL-2K"
2. Mobile reader "Radius MR"
3. Rescuer's searching device "Radius SHRP"

Website: [www.radius-nvic.ru](http://www.radius-nvic.ru)

Region: Krasnoyarsk region

Industry: Radio electronic industry

Export geography: Kazakhstan, Uzbekistan

Potential markets: China, Germany

Advantages of product/company:

- ✓ Unique technology
- ✓ Own production base
- ✓ Highly qualified specialists

Demonstration: Product examples

Representative: Ruslan Smirnov,  
Deputy development director

# EXHIBITORS OF FORUM MADE IN RUSSIA 2021

## RAKURS ENGINEERING LLC

Rakurs-Engineering carries out a full cycle of activities for the development and implementation of complex automated control systems for power industry facilities: R&D, engineering, software development, manufacturing and testing of equipment, installation and commissioning, personnel training, and maintenance of systems.

In the 30 years that the company has been operating in the industrial automation market, more than 1,700 projects have been implemented at hydro, heat and nuclear power plants. The total capacity of power plants operated under the control of the process automatics by Rakurs is more than 50 GW.

### Products:

Automated process control systems

Website: [www.rakurs.com](http://www.rakurs.com)

Region: Saint-Petersburg Industry: Energy industry

Export geography: Uzbekistan, Tajikistan, Kazakhstan, Kyrgyzstan, Moldova, Belarus, India, Mongolia, Angola

Potential markets: Russian Federation, Uzbekistan, Tajikistan, Kazakhstan,

Kyrgyzstan, Moldova, Belarus, India, Mongolia, Angola

Advantages of product/company:

Russian company with extensive experience in creating APCS

A convincing reference

Own research and production complex

Annual investment in R & D.

Member of the TOP 30 innovative companies in Russia

Financial and industrial viability

Proactive customer service

Quality management system ISO 9001: 2015

Demonstration: PORTABLE DEMONSTRATION SYSTEM

Representative: Vladislav Voytenok-Senior software engineer

## GAME SYSTEMS LLC

We have been on the market of innovative attractions and simulators. We have 13 inventions, 5 established simulators, 2 software complex, 160 amusement parks in 25 countries of the world.

### Products:

1. ProfPass
2. VStrike
3. ProfGame

Website: [profpass.ru](http://profpass.ru)

Region: Moscow

Industry: software development

Export geography: more than 25 countries

Potential markets: the US consumer market, Europe consumer market

Advantages of products/company:

- ✓ Scientific approach
- ✓ Mixing playing and learning
- ✓ Easy scaled up

Demonstration: VR-technology

Representative: Stoyka Vasily Nikolaevich- Deputy general director.

## IVA Technologies LLC

IVA Technologies is a Russian high-tech manufacturer of innovative IT solutions for modern digital infrastructure. IVA Technologies has consolidated R&D and technological competencies in microelectronics, applied mathematics, radiophysics and radio engineering, bringing together the best developers, engineers and researchers.

### Products:

1. IVA MCU unified communications platform for fully functional secure collaboration via video conferencing
2. IVA CV automatic facial recognition system
3. IVA S/W mobile underwater radio complex
4. IVA TPU tensor processor

Website: [en.iva-tech.ru](http://en.iva-tech.ru)

Region: Moscow

Industry: IT

Export geography: CIS, China, UAE, Cyprus

Potential markets: Australia, China, India, Indonesia, Brazil, Venezuela, Mexico, Korea, Malaysia, Singapore, CIS

### Advantages of product/company:

IVA MCU - Built-in full-fledged Messenger

IVA CV - Top 5 in the world by MegaFace

IVA S/W - Electromagnetic communication channel unparalleled in the world

IVA TPU - 4X GPU Performance

Demonstration:

IVA MCU - TV panel, laptop, system unit, codec

IVA CV - TV panel, laptop, camera on a tripod

IVA S/W - Life-size radio station and mask

IVA TPU - mock-up microprocessor (system unit)

Representative: Yuriy Modlinskiy, Business Development Director

## GEOSCAN GROUP

Geoscan group develops and manufactures unmanned aerial systems and software for industrial usage such as 3D modeling, precision farming, geologic exploration, etc.; creates geoinformation systems and geoportals, provides services using UAV: aerial photography, spectral survey, thermal imaging, geophysical survey, pipelines monitoring, roads and power lines inspection, drone shows indoors and outdoors.

### Products:

1. Geoscan 201
2. Geoscan 401
3. Geoscan Gemini
4. Geoscan 701
5. Geoscan 1U/3U

# GEOSCAN

Website: [geoscan.aero/en](http://geoscan.aero/en)

Region: Saint - Petersburg

Industry: Research and development in the field of natural and technical sciences

Export geography: Europe, Southwest Asia, Central Asia, Latin America, Antarctica ( "Progress" stations), Arctic (Bely Island)  
Agisoft Metashape is available in over 140 countries worldwide.

Potential markets: Africa, Latin America, Southeast Asia.

Potential markets: Africa, Latin America, Southeast Asia.

Advantages of product/company:

- ✓ The quality of the received data
- ✓ One of the best price/performance ratio compared to competitors
- ✓ After-sales service, assistance in solving all technical issues
- ✓ Reliability of structures and software

Demonstration: full-size and accurate mock-ups of unmanned drones and airplanes, as well as the broadcast of the flight and the received data in video clips on the screens. Models are placed on special racks or hung.

Representative: Daniil Zolotnik- Sales Manager.

## ROSGEO JSC

Rosgeo is the largest geological holding in Russia with developed production and technical capabilities, high professional competences and a unique scope of accumulated geological information. The company performs all types of geological prospecting and exploration activities for all types of mineral resources, possesses the unique competence in the area of offshore and shelf operations.

### Products:

Website: [www.rosgeo.com](http://www.rosgeo.com)

Region: Moscow, Russia

Industry: geology

Export geography: CIS, Africa, Middle East, South Asia

Potential markets: UAE, KSA, India, Bangladesh, Pakistan

Advantages of product/company:

- ✓ full cycle of geological services
- ✓ Leading experts
- ✓ Unique databases

Demonstration: sample of product

Representative: on approval

## KALASHNIKOV Group of Companies

The Kalashnikov Group of Companies produces 95% of small arms in Russia. The enterprises of the Group of Companies produce combat automatic and sniper weapons, guided artillery shells, unmanned aerial systems, civil and military vessels. The Group of Companies includes 7 production sites in 7 regions of Russia.

### Products:

1. Civil shipbuilding products
2. Unmanned aerial vehicles

Website: [kalashnikovgroup.ru](http://kalashnikovgroup.ru)

Region: Russia, Izhevsk

Industry: the industry of conventional weapons

Export geography: more than 27 countries of the world, including India, Saudi Arabia, Armenia

Potential markets: Middle East, Southeast Asia, Africa, Latin America

Advantages of product/company:

1. Constant updating of the line of military and civilian products while maintaining its quality and legendary reliability
2. Competitive price
3. Readiness for technology transfer and joint production of products on the territory of partner countries
4. Developed production system; well-established "closed cycle« production

Demonstration: product layouts

## RD&P Center ORION

Short information about company

“Orion” is the State Scientific Center of the Russian Federation, the only one in the field of solid-state photoelectronics. Many types of new high-tech products have been developed and mastered in production: night vision and target designation devices, photodetectors and focal plane arrays, thermal imaging devices, and other devices.

### Products:

1. SWIR camera
2. Fire safety arrangements (patches, cord, fire-extinguishing paints)
3. Night vision goggles «Alpha-2031»

Products photos

Website: [www.orion-ir.ru](http://www.orion-ir.ru)

Region: Moscow

Industry: scientific research and production of high-tech products

Potential markets: CIS, African and Asian countries

Advantages of product/company:

- ✓ Unique equipment
- ✓ High-tech production

Demonstration: The camera is turned on and display the image on a TV panel or laptop screen, fire protection systems will be shown in boxes, helicopter glasses - on helmet.

Representative: Svetikova Anastasia, Head of marketing department.

## EKRAN OPTICAL SYSTEMS JSC

JSC "Ekran-optical systems" is an innovative high-tech enterprise. We have been dealing with image intensifier tubes over 60 years, within this period we have made a significant improvement in the design, production technology and modernization of material and technical base.

### Products:

1. EPM-207
2. Image Intensifier Tubes 2+ generation

Website: <http://ekran-os.ru/>

Region: Novosibirsk region

Industry: production of image intensifier tubes

Export geography: China, USA, Bulgaria and others

Potential markets : Europe, expanding exports to China, USA

Advantages of product/company:

- ✓ High quality products
- ✓ Prices are lower compared to competitors

Demonstration: placing the products on a horizontal surface

Representative: Deryabina V.V., technical director

## RUBIUS GROUP LLC

Rubius Group LLC specializes in software development. More than 500 companies use software products including Gazprom, Rosneft, Lukoil, Severstal, Google, Netflix, Stanford, BBC, HP, IBM, Tesla, Porsche, Yandex, Cargill, Socar, Olympus, Mail.ruGroup and other companies.

### Products:

1. Planyway - team calendar and timeline (<https://planyway.com/>), which already has over 500,000 users worldwide
2. Qubius – soundproof office booths for calls and conversations (<https://qubius.com/>)
3. Custom software development services

Website: <https://rubius.com/>

Region: Tomsk

Industry: IT

Export geography: Countries of North America, Europe

Potential markets: Countries of South America, Europe, Asia

Advantages of product/company:

- ✓ Planyway is used by 30,000 companies from 190 countries of the world including McKinsey, Booking, Siemens, Intel, Uber, Google, Netflix
- ✓ The company is in the top 100 Russian companies for 2021 by the international independent rating of B2B developers Clutch.co (<https://clutch.co/>)

Demonstration: show of products in electronic form, printed materials, videos

Representative: Ilya Novoseltsev, Director of Business Development

## TERRA TECH JSC

Joint-stock company «Terra Tech» is a subsidiary of JSC «Russian space systems» (part of the State Corporation ROSCOSMOS) commercial provider of remote sensing data and geoinformation services based on satellite imagery.

### Products:

1. Complex of geoinformation services «Digital Earth»
2. Earth remote sensing data visualization complex ATLAS VR

Website: [www.terratech.ru](http://www.terratech.ru)

Region: Russian Federation

Industry: Aerospace

Export geography: Middle East (UAE)

Potential markets: Middle East, South-East Asia, Latin America

Advantages of product/company:

- ✓ Area of interest - the whole globe
- ✓ Finished analytical product
- ✓ Worldwide access to geoservices

Demonstration:

- VR-zone Digital twin of the Earth ATLAS VR
- Geoservices «Digital Earth»

Representative: Mikhail Berezkin, ERS-product development expert

New level of education solutions

# EXHIBITORS OF FORUM MADE IN RUSSIA 2021

## RAZVITIE LLC

Brief information about the company:

We have been designing, manufacturing and selling interactive anatomy tables for over ten years. These are over 100 tables supplied to educational institutions in Russia and the CIS countries. In 2019, the product entered the Southeast Asia and European markets. Our team consists of doctors, teachers, developers and engineers. The development, production and implementation of the product in the educational processes of universities is carried out by the "Razvitie" company. Scientists anatomists of the Samara State Medical University are responsible for the scientific and methodological part.

### Products

1. **Interactive Anatomy Table "Pirogov"**
2. **A set of software licenses "Interactive Anatomy 3D Atlas Pirogov» (The software is provided to the end-user with the purchase of the table)**

*Pirogov*

Website: [nash-pirogov.ru/en](http://nash-pirogov.ru/en)

Region: Samara region

Industry: Production of educational equipment, IT

Export geography: CIS countries, Europe, South-Eastern Asia

Potential markets: **Europe, South-Eastern Asia, Africa, Arabic Gulf Countries**

### Product / company advantages:

- ✓ Innovative educational product
- ✓ Accurate 3D human body model
- ✓ The ability to use for group and individual work, the possibility of organizing distance learning
- ✓ Compliance with the international anatomical classification FIPAT

Demonstration: anatomy table + demonstrating a mobile app at a screen and/or on various devices

Representative: Maria Fedorova, export director

# EXHIBITORS OF FORUM MADE IN RUSSIA 2021

## LOGOS LLC

Logos Production Firm is a specialized enterprise with a focus on the development and manufacture of the state-of-the-art training facilities for military armored and automotive equipment, commercial machinery and equipment, as well as drivers' actions live monitoring and recording systems for driving tests and competitions.

### Exposition:

1. Special purpose equipment operation simulators
2. Municipal transport driving simulators

Website: [www.logos-sim.com](http://www.logos-sim.com)

Region: Moscow

Industry: IT

Export geography: Belarus, Kazakhstan, Egypt

Potential markets: Eastern European countries, Italy, France

Advantages of product/company:

- ✓ Huge accumulated experience in the production of simulators for public and special transport
- ✓ Accurate vehicle models, high-quality computer graphics

Demonstration: working models of simulators

Representative: Director N. Ilinsky

## BRAIN DEVELOPMENT Ltd

Russian developer and manufacturer of educational systems educational robotics, neurotechnology, additive technology, programming, computer vision and artificial intelligence under the brand name "ROBOTREK".

### Products:

1. Digital educational hardware and software complex "Young neurophysiologist-engineer"
2. Digital educational hardware and software complex "Young neurophysiologist-engineer"
3. Educational complex for the study of the fundamentals of artificial intelligence (NEURO NETWORK) ARTINTREC PRO

Website: [robotrack-rus.ru](http://robotrack-rus.ru)

Region: Russia, Saint-Petersburg

Industry: IT

Export geography: Kazakhstan, Uzbekistan, Kyrgyzstan, Turkey.

Potential markets: China, Armenia, India, UAE, Saudi Arabia

Advantages of product/company:

- ✓ Availability of teaching aids, free teacher training and support.
- ✓ Teaching children from the age of 12 with the most modern digital technologies for the professions of the future.
- ✓ High-quality equipment, included in the Register of Industry and Trade of the Russian Federation.

Demonstration: Training equipment in a sales package will be presented, as well as interactive models: robots with artificial intelligence for identifying objects and emotions, neuro-sumo, neuroprotection of a mobile platform.

Representative: Babenkova N.E. CEO, Polyakov A.S. Deputy Head of Development Department

# EXHIBITORS OF FORUM MADE IN RUSSIA 2021

## NOVIY DISK LLC

Noviy Disk is the largest developer, publisher and distributor of multimedia software, integrator of digital educational solutions and has a wide range offers aimed at automating the management of the education system, modernizing the educational process, implementing the requirements of modern educational standards by teachers and achieving high educational results by students.

### Products:

1. Get ready for school with Roboborik!
2. Obrazovarium Digital School

Website: <http://school.nd.ru/>  
<https://roboborik.com/>  
<https://obr.nd.ru/>

Region: Moscow

Industry: Education

Export geography: Kazakhstan, China, Serbia

Potential markets: Ministry of Education, Regional offices and departments, District offices and partners of CIS, Europe, Middle East and Africa, Southeast Asia

Advantages of product/company:

- ✓ Since 1992 a leader in electronic education and multimedia content market of Russia/CIS
- ✓ Innovative and cutting-edge approach to education
- ✓ The largest publisher and distributor of software and multimedia products

Demonstration: on screens, brochures

Representative: Shirokov Maxim, Head of a Strategy Department

Retail and vending

## BRANDFORD LLC

«PLACE-A» LLC, trading division of the manufacturer of commercial refrigeration equipment “Zavod Brandford” LLC. On the market since 2005, a wide range of equipment for supermarkets and grocery stores.

### Products: one of samples

1. Counter «AURORA»
2. Multideck “TESEY”
3. Confectionary display «VETE»

Website: [brandford.ru](http://brandford.ru)

Region: Kostroma area

Industry: refrigeration industry

Export geography: Azerbaijan, Georgia, Uzbekistan, Belarus, Kazakhstan, UAE, India, Palestine, Peru, Greece, Serbia.

Potential markets: Colombia, Ecuador, Chile, Finland, Sweden, Holland, Germany.

Advantages of product/company:

- ✓ Innovative cooling technologies;
- ✓ Using eco-friendly refrigerant;
- ✓ Application of energy-saving technologies

Demonstration: Freestanding units of refrigeration equipment's.

Representative: Alexander Sharipov, Head of Export Department.

## Ecoplatform

Ecoplatform is a first fully Russian-made Reverse Vending Machine that accepts empty consumer containers for recycling.

Models have been developed for placing machines on the street and indoors, both with a press and without. Accepted fractions: plastic bottles, aluminum cans, glass containers and tetrapak packaging.

In June 2021, the company's fandongats collected the fourth million units of containers, which are guaranteed to be sent for recycling.

### Products:

1. Fandongat

**ecoplatform**

Website: [ecoplatform.tech](http://ecoplatform.tech)

Region: Moscow

Industry: waste management

Export geography: Kazakhstan, Croatia, Netherlands, Belarus, Spain

Potential markets: CIS, Africa, Eastern Europe, UAE

Advantages of product/company:

- ✓ The most effective statistics of the collection of the fandongat network in Russia
- ✓ Own IT structure, software development from scratch and integration of various levels
- ✓ An experience. Clients: VkusVill, Perekrestok, Globus, Lenta, Tetrapak, LPAK, Sibur, etc.
- ✓ Wide geography: 10 regions of the Russian Federation and 5 countries

Demonstration: installation of a fandongat

Representative: Gusakov Ivan, General Director

Medicine

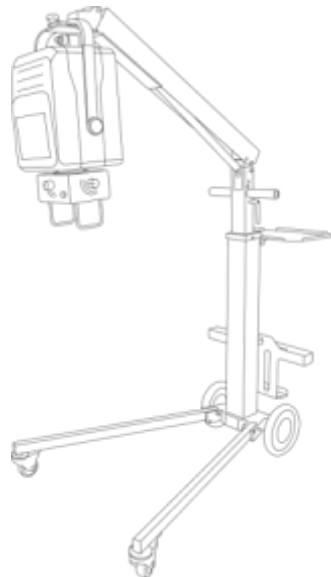

# EXHIBITORS OF FORUM MADE IN RUSSIA 2021

## MTL LLC

MTL- a major manufacturer of digital X-ray equipment and software solutions, is the number 1 among systemically important businesses in the Russia's medical technology industry.

### Products:

1. DIARM™ MW Mobile DR Suitcase System
2. MobiRen™ Mobile Digital X-Ray System

Website: [en.mtl.ru](http://en.mtl.ru)

Region: Moscow, Russia

Industry: Medical industry

Export geography: Kazakhstan, Uzbekistan, Italy, Chile, Philippines

Potential markets:

Advantages of product/company:

- ✓ Innovative products
- ✓ International standards
- ✓ Complex solutions

Demonstration: mobile system

Representative: Georgiy Gevorkyan- Export director

## ORTORENT LLC

The company **Ortorent LLC** is a Russian manufacturer of medical equipment for rehabilitation of patients with diseases of the locomotor apparatus, peripheral and central nervous system.

### Products exhibited:

1. Bicycle ergometer "ORTORENT VELO"
2. Device for mechanotherapy "Ortorent", model "MOTO"
3. Rehabilitation suspension for patient verticalization, model «Ortorent C++»
4. Motor device for robotic mechanotherapy of the upper extremities «ORTORENT», model «ORTORENT-HAND»

Website: [www.ortorent.ru](http://www.ortorent.ru)

Region: Moscow region

Industry: manufacturing of medical equipment

Export geography: Kazakhstan, Azerbaijan

Potential markets: CIS countries and non-CIS countries

Advantages of production/company:

- ✓ The equipment produced by our company answers all the standards of equipping rehabilitation institutions and is approved by the Order of the Ministry of Health of the Russian Federation dated July 31.
- ✓ We engineer and manufacture our equipment ourselves, that is why we offer the product, which is cheaper than western analogs but it does not inferior them in quality.

Stand demonstration: the most demanded devices of mechanotherapy are introduced on the stands.

Company representatives at the stand:

The General Director: Velikov Oleg

The Marketing director: Pykhova Oksana

The Head of the Sales department: Khokhryakova Evgenia

## PA UOMP JSC

UOMP is one of the biggest enterprises of optical sector in Russia that develops and manufactures optical-electronic systems for various purposes, medical equipment, light equipment, instruments for geodesy and optical measurements. In 2020 the medical equipment is supplied for the first time to the hospitals of Oman, Ghana, Surinam, Slovenia. JSC «PA «UOMP» participates in 9 national projects of the RF.

Exhibited products:

Mobile incubator BONNY

Medical pulseoxymeter Sensorex

Multifunctional device of inhalation anesthesia MAIA-01

**Site:** uomz.rf

**Region:** Ekaterinburg, Sverdlovsk region

**Industrial sector:** Medical equipment

**Geography of export:** Countries of CIS, South-Eastern Asia, Eastern Europe, Middle East, South Africa

**Potential markets of sales:** Western Europe, Africa, Latin America

**Advantages of products / company:**

- ✓ Wide geography of export
- ✓ Availability of certificates CE, ISO
- ✓ Availability of experience in complex projects realization

**Demonstration at the stand:** In form of demonstration full size samples

**Representative of the Company at the stand:** to be defined

## GRANAT BIO TECH LLC

GRANAT BIO TECH - production of modern disposable medical plastic products for laboratory diagnostics. The company was founded in 2016 by an initiative team of professionals in the field of laboratory diagnostics and the production of plastic packaging.

Reliability and quality without compromise is what drives the Garnet Bio Tech team in designing and creating each component of the product. To do this, we use the latest high-tech equipment designed specifically for our production and carefully select raw materials from the world best suppliers.

### Products:

1. Acti-Fine® vacuum blood collection tubes.
2. Double-ended needles «Acti-Fine®» with visualization chamber.
3. Single-use holders «Acti-Fine®» for vacuum blood collection systems

Representative:  
Anastasiya Burlachenko

Website:<http://granatbio.ru>

Region: Moscow Region, Dubna

Industry:

Potential markets: EU,EAEU,Middle East.

Advantages of product/company:

For secure transportation and ease of use in laboratory, all Acti-Fine® tubes are coupled with safety screw caps. Sealed threaded joint for tubes and caps excludes aerosol effect while removing caps and protects medical staff against possible infection.

Blood collection needle has a visio chamber that makes it more comfortable for application as it helps a nurse to see blood flowing when needle enters vein.

The design of needle is non-removable that prevents needle from accidental disconnection and infection of personnel during collection of blood.

## POTOK INTER LCC

«Potok Inter» LCC air decontamination equipment market leader with unique patented technology used by NASA, Roscosmos, ESA destroys 99,99% of microorganisms including SARS-CoV-2 and all airborne viruses, bacteria and mold.

### Products:

1. Potok SAP120 standalone unit
2. Potok FED180 induct mount unit in a one-piece outer enclosure

**Website:** [www.potok.com](http://www.potok.com)

**Region:** Moscow

**Industry:** Healthcare, Food industry, Education, Space Industry

**Export geography:** Belarus, Kazakhstan, Uzbekistan, India, South Korea, Serbia, Lithuania, Holland, Great Britain, Hungary, Poland, USA, UAE, Saudi Arabia

**Potential markets:** Europe, North America, Japan, South Africa, Nigeria

### Advantages of product/company:

- ✓ Ultimate air decontamination technology with an efficiency of 99.99% in less than 0.5 seconds
- ✓ A unique technology that does not use UV, Ozone or HEPA for disinfection
- ✓ Safely work 24/7 in the presence of people
- ✓ It is used by Roscosmos, NASA and ESA to provide safe air for astronauts on the ISS

## POZIS JSC

POZIS produces household and medical devices, профессиональные professional refrigerators for storing wine and furs.

### Products on display :

1. Refrigerator for storage of vaccines active VacProtect VPA-200 “POZIS”
2. Medical freezer MMSH-220 “POZIS”
3. UV air disinfection recirculator ORB-1P “POZIS”

**POZIS**

Republic of Tatarstan

Mechanical engineering

Export geography: CIS, Europe, Asia

Potential sales markets : East Asia

Product / company advantages :

- ✓ Modern high-tech technology
- ✓ Certified in Europe(CE)
- ✓ The equipment was created in cooperation with the professional community

Demonstration at the stand: natural product samples. Representative of the company at the stand: Khasanov B.R., Deputy General Director for Strategic Marketing.

Transport and Agri machinery

## ROSTSELMASH

Rostselmash is a group of companies including 13 facilities located at 11 production sites in 5 countries worldwide.

The company's product range includes over 24 types of equipment and 150 models and modifications, including but not limited to grain and forage harvesters, tractors, sprayers, forage making and grain processing equipment and other. Also, the company's product portfolio includes E-solutions to boost the performance of agricultural operations and business.

### Products:

1. RSM 161 grain harvester model
2. RSM 2375 tractor model

**ROSTSELMASH**  
Professional Agrotechnics

Website: <https://en.rostselmash.com>

Region: Rostov district

Industry: Agricultural engineering

Export geography: More than 40 countries (CIS countries, Eastern and Western Europe, Africa, Mongolia, the Middle East and Asia)

Potential markets: Australia, France, India.

Core values of the company:

Globality. Modernity. Innovation.

Demonstration at the stand: demonstration of combine harvester and tractor models to the forum participants.

The company's representative at the stand: Anton Malykhin, Export Director.

## SINARA TRANSPORT MACHINES

Sinara-Transport Machines (part of the Sinara Group) is one of the largest Russian holdings of transport engineering. STM activities cover the entire life cycle of locomotives and track machines: from building to after-sales service.

### Products:

1. Electric locomotive 2ES7
2. Service vehicles for railways

Website: [sinaratm.ru](http://sinaratm.ru)

Region: Moscow

Industry: railway transport engineering

Export geography: CIS countries, India, Republic of Cuba

Potential markets: Latin America, Asia, Africa

Advantages of product/company:

- ✓ Contemporary high-performance technologies
- ✓ Complex of services for the production, supply and maintenance of railway equipment

Demonstration: models.

Representative: on approval.

## UMATEX ROSATOM

UMATEX is a Promising Materials and Technologies division of ROSATOM State Corporation. It set up to create a market of composite materials in Russia. Comprises an R&D center and enterprises manufacturing high-strength and high-modulus carbon fiber, carbon fiber fabrics and preregs.

### Products:

1. Carbon fiber
2. Carbon fabrics
3. Preregs

Website: [umatex.com](http://umatex.com)

Region: Russia

Industry: Chemical

Export geography: Europe, China USA

Potential markets: the whole world

Advantages of product/company:

- ✓ Complete production chain
- ✓ UMATEx products are durable and resistant to most chemically aggressive reagents

Demonstration: coil of carbon fiber, samples A4 of fabrics and preregs

Representative: Maria Yurieva, PR and marketing manager

# EXHIBITORS OF FORUM MADE IN RUSSIA 2021

## SEGEZHA GROUP

One of the leading international timber industry holdings with a vertically integrated structure and a full cycle of logging and deep wood processing.

### Products:

1. Kraft paper (samplebook)
2. Paper packaging (samples)
3. Birch plywood (samplebox)
4. CLT-panels (samples)

**Website:** <https://segezha-group.com/>

**Region:** Republic of Karelia

**Industry:** Forest, wood processing, pulp and paper industry

**Export geography:** Europe, North America, South America, Asia, Middle East. More than 100 countries of presence.

**Potential markets:** Latin America, South Africa

### Advantages of product/company:

- ✓ Own high quality resource base
- ✓ Wide logistic possibilities
- ✓ High level of service and customer support

**Demonstration at the stand:** samples of craft bags and CLT panels, samplebook with samples of paper, samplebox with samples of plywood.

**The representative at the stand:** under approval

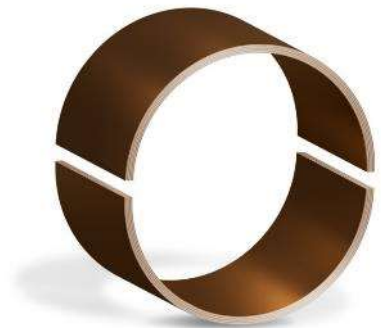

## SVEZA-LES LLC

Modern, fast-growing company entered the echelon of the leading players in the woodworking market. Our products have earned trust in 90 countries. They are used in construction of skyscrapers, Olympic facilities, production of cargo trailers and high speed trains, tankers for the transportation of liquefied gas, manufacture of eco-furniture and stylish interiors.

### Products:

1. SVEZA Gas
2. SVEZA HCV
